

JESSICA GRAF

Austin, TX • Jgraf42407@gmail.com • linkedin.com/in/jessicagraf • (512) 555-0100

PROFESSIONAL SUMMARY

Lead Microsoft 365 Copilot and AI architect with 20+ years of enterprise consulting delivery and deep hands-on expertise across the full Microsoft AI and Power Platform stack. I design and ship production-grade Copilot Studio solutions, custom copilot extensions, Microsoft Graph integrations, and AI-powered workflows — and I've built RAG (Retrieval-Augmented Generation) pipelines from the ground up, including a working open-source implementation with vector store ingestion, grounded answer generation with citations, FastAPI backend, and Streamlit UI. I bring the rare combination of genuine AI engineering depth, enterprise governance experience across FedRAMP and HIPAA-regulated environments, and the client-facing consulting presence to lead complex engagements from requirements through delivery.

TECHNICAL SKILLS

Copilot & AI	Copilot Studio, custom copilot design & extension, copilot orchestration, prompt engineering, AI Builder, Microsoft Foundry, agentic workflows
RAG & LLM	RAG pipeline design & implementation, vector store ingestion, embedding pipelines, grounded answer generation with citations, OpenAI API, FastAPI, Streamlit
Power Platform	Power Apps (Canvas & Model-Driven), Power Automate (cloud & desktop flows), Power BI, Dataverse, custom connectors, environment governance, DLP
Graph & APIs	Microsoft Graph API, REST API design & integration, OAuth/authentication protocols, data orchestration, external system integrations
Azure & Cloud	Azure Functions, Azure Logic Apps, Azure AI Services, Entra ID/Azure AD, Conditional Access, Azure storage & compute, cloud-native solution patterns
M365 Platform	SharePoint Online, Teams, Exchange Online, OneDrive, SPFx, Microsoft Purview, sensitivity labels, retention, DLP, compliance governance
Dev & Tooling	Python (pandas, numpy, FastAPI, Streamlit, LangChain-compatible patterns), JavaScript/TypeScript, PowerShell, JSON, Git
Governance	FedRAMP High, FISMA, HIPAA, NIST 800-53, enterprise AI governance frameworks, security models for AI solutions, audit readiness

SELECTED PROJECTS & AI WORK

LLM RAG Starter — Open Source RAG Implementation

github.com/jessicagraf/llm-rag-starter

- Built a complete Retrieval-Augmented Generation system from scratch — PDF/TXT ingestion into a local vector store, question answering with grounded citations, deterministic demo mode (no API key required) and OpenAI integration for production quality.
- Implemented dual interfaces: FastAPI REST API for programmatic access and Streamlit UI for interactive document Q&A; — fully self-contained and deployable without external dependencies.
- Demonstrates end-to-end RAG architecture: document chunking, embedding generation, vector similarity search, context injection, and citation-grounded response generation.

Enterprise Copilot Studio & Microsoft Foundry — Active Development

- Designing and building custom Copilot Studio agents connecting SharePoint knowledge bases, Graph API data sources, and external REST APIs to deliver intelligent self-service and workflow automation scenarios.
- Exploring Microsoft Foundry agentic patterns including multi-agent orchestration, tool use, and production governance frameworks for enterprise AI deployments.

PROFESSIONAL EXPERIENCE

Independent M365 & AI Architect

Self-Employed | 2024 – Present • Remote

- Architect and deliver Copilot Studio solutions, Power Platform automation, and M365 AI integrations for enterprise clients — designing custom copilot extensions, Graph API integrations, and governance frameworks aligned to client compliance requirements.
- Build RAG-based knowledge retrieval systems and AI-powered workflow automation connecting M365 data sources to intelligent agent experiences.
- Serve as technical SME and trusted advisor on Microsoft AI strategy, Copilot governance, and Power Platform architecture for client leadership teams.
- Implement enterprise AI governance frameworks including data protection, access controls, DLP, and compliance configurations for regulated-industry clients.

Senior M365 & Power Platform Architect

MERP Systems | 2022 – 2024 • Remote

- Designed and delivered Copilot Studio agents and Power Platform solutions for CDC and USGS federal tenants under FedRAMP High compliance — architecting custom copilot extensions, Power Automate flows, and SharePoint-integrated AI experiences.
- Built Microsoft Graph API integrations connecting Power Platform solutions to agency enterprise systems and external data sources, enabling context-aware intelligent workflows.
- Established AI governance and compliance frameworks for federal AI solution deployments — DLP policies, sensitivity labels, access controls, and audit documentation aligned to NIST 800-53.
- Maintained zero audit findings across annual FISMA assessments while shipping production AI and automation solutions.

M365 & Power Platform Architect

Carollo Engineers | 2019 – 2022 • Austin, TX

- Led Power Platform and M365 AI initiative strategy for a 1,500-person engineering firm — Canvas apps, Power Automate flows, AI Builder document processing, and Copilot readiness frameworks.
- Built Microsoft Graph API integrations connecting SharePoint and Power Platform to project management and ERP systems, enabling intelligent data surfacing within the M365 experience.
- Drove 90%+ enterprise platform adoption without mandates through user-centered AI and automation solution design.
- Delivered \$400K in annual savings and 50% cycle time reduction through Power Platform automation and AI Builder workflow solutions.
- Led a 15-person team of developers and Power Platform practitioners — mentoring on architecture decisions, Graph API patterns, and best practices for scalable AI integrations.

Power Platform & M365 Architect

Alpha Omega Integration | 2017 – 2019 • Remote

- Delivered Power Platform architecture and Microsoft Graph API integration solutions for federal agency clients under FedRAMP and FISMA compliance, building custom connectors and REST API integrations.

M365 & SharePoint Architect

Hanger, Inc. | 2014 – 2017 • Austin, TX

- Owned M365 and Power Platform solutions for a 5,000-user HIPAA-regulated healthcare organization — Canvas apps, Power Automate workflows, and SharePoint-integrated document intelligence that reduced claims processing cycle time by 75%.

Senior Systems Engineer

Dell Technologies | 2004 – 2014 • Austin, TX

- Provided enterprise M365 and platform engineering support for 100,000+ users globally, serving as escalation lead for SharePoint, Exchange Online, and identity platform incidents.

EDUCATION & CERTIFICATIONS

- **Microsoft Certified: Power Platform Solution Architect Expert**
- **Microsoft 365 Certified: Enterprise Administrator Expert**
- **Microsoft Certified: Azure Administrator (AZ-104)**

- Bachelor of Science, Information Technology
